

THE UNIVERSITY OF CHICAGO
CHICAGO 37 • ILLINOIS
DEPARTMENT OF ZOÖLOGY

Dear Lederberg: -

Paul Weiss tells me that you have agreed to give a lecture to the general biology class on some phase of bacterial genetics. Tues. Febr 13. He will be away and has asked me to introduce you. Hence I suggest you come to my office (Zoology Bldg Room 33) sometime before the lecture. If you are in the campus before noon - plan to have lunch with me at the club.

Last time you visited us you were kind enough to talk to our genetics club groups. We would like a meeting this time if that is not asking too much of you. Of course you may not want to be tied down that evening or may want to return to Madison early that evening. However, if your plans permit it we would welcome an informal or formal discussion for about an hour - perhaps at 7 pm Febr 13 or later in the evening if you like. Please let me know if you can do this.

Cordially yours

Herbert H. Strandskov.

I should like to know by Friday of this week. Febr 9
